

School Closures During COVID-19

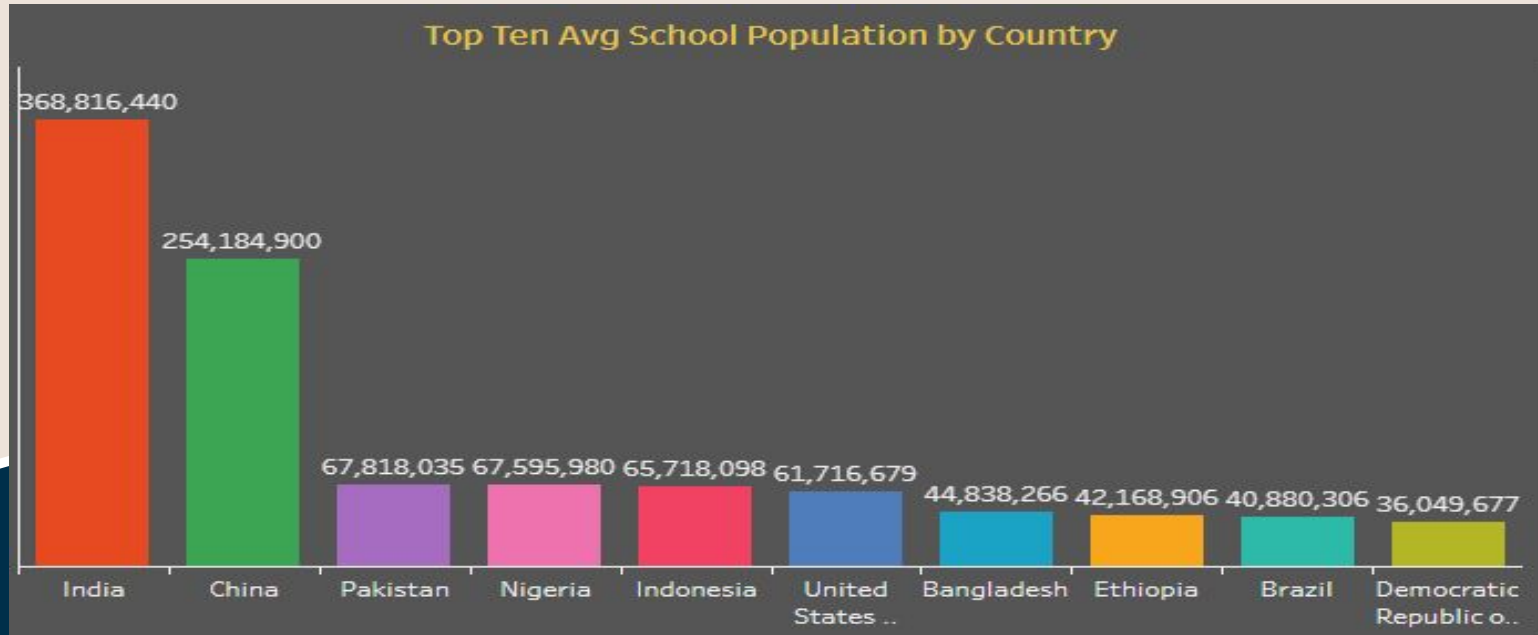

From 2020 - 2022

A dark blue diagonal gradient bar that starts from the bottom left and extends towards the top right, covering the lower half of the slide.

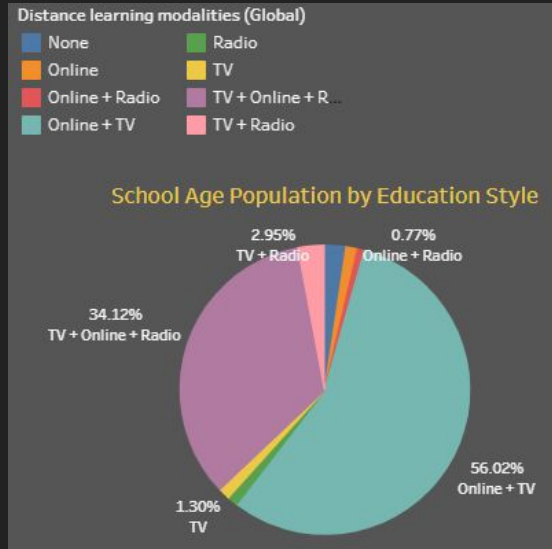

Intro

The COVID-19 crisis has significantly affected the education sector across all regions. The closing of schools has interrupted the functioning of the system, reducing student learning, and restricting the activities of education authorities, parents, and decision-makers. As the pandemic progresses, many important decisions need to be made based on a systematic understanding of deployed policies up to date.

Education Styles throughout the pandemic

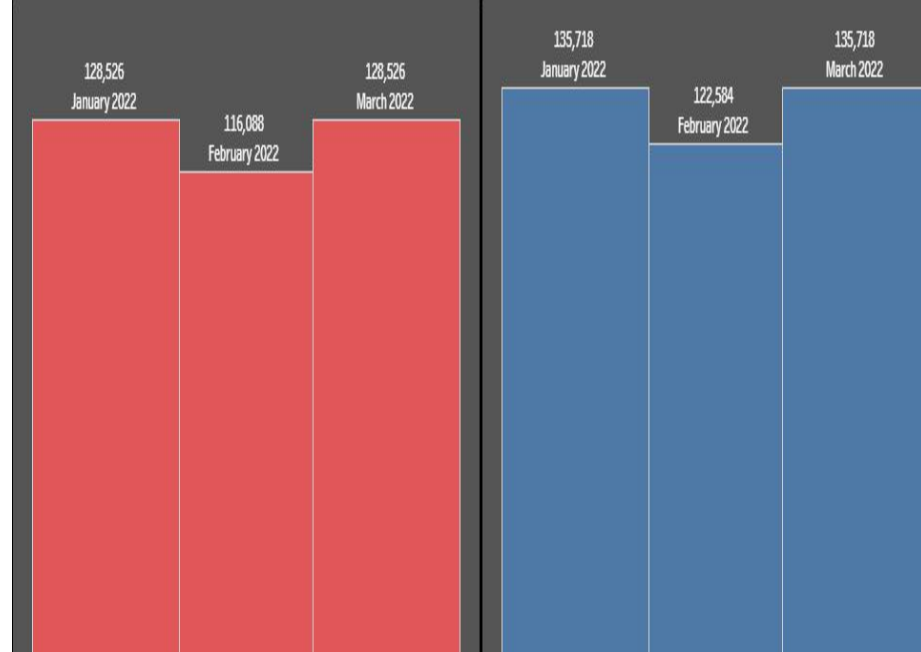

Weeks Fully Closed vs Partially Open 2020-2022

Fully Closed vs Partially Open by Month

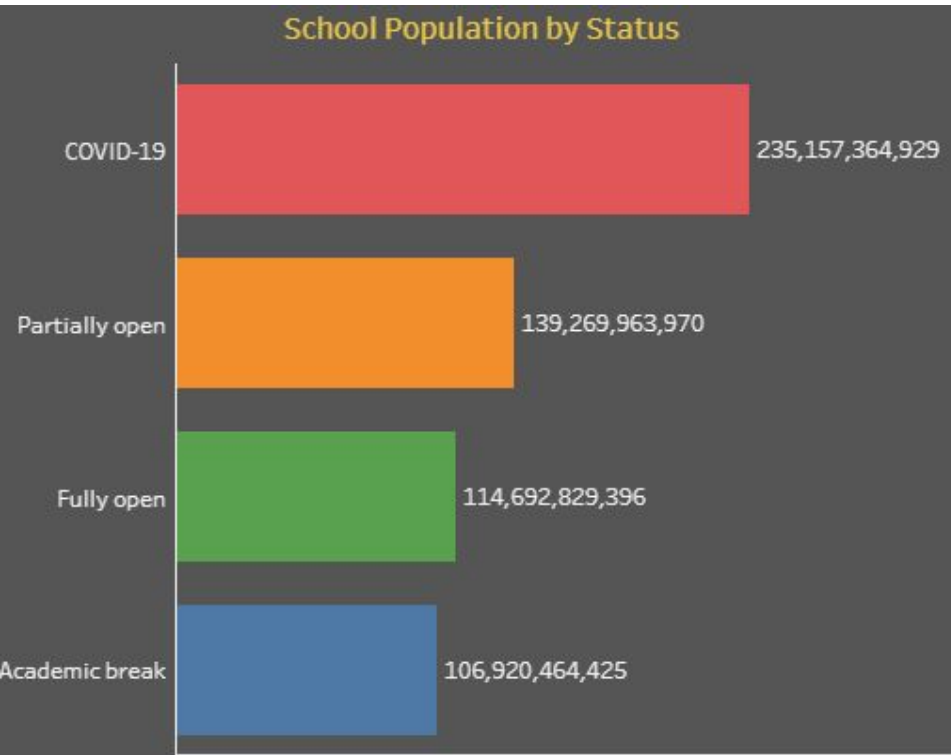

Fully Closed vs Partially Open by Month

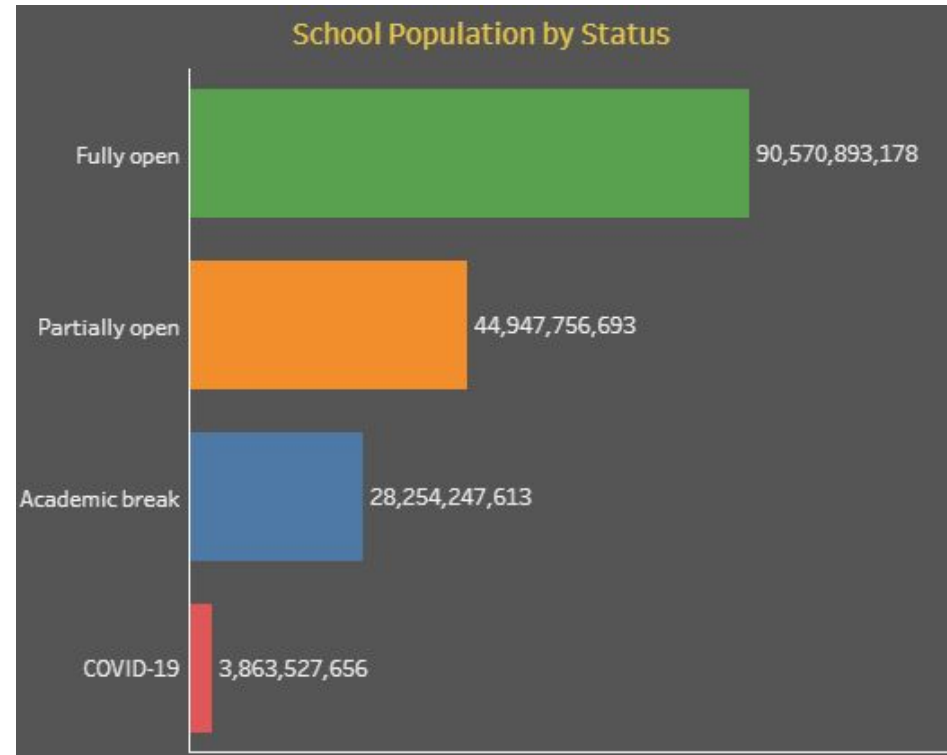

School Population by Status

2020

2022

Executive Summary

- India and China had the largest school population throughout the pandemic
- The largest education styles during the pandemic were online + tv and online + tv + radio
- There were more partially open schools during the pandemic than at the end of 2022
- There were still a high number of partially open schools at the end 2022 which is surprising because they were almost double the amount that was fully open.
